John M. Murphy with Martin H. Belsky 297

Information for Authors

Please read and note the information provided below when submitting manuscripts for publication. Careful adherence to these instructions will help insure prompt review of the manuscript.

Manuscripts. All manuscripts should be submitted to the Editor-In-Chief, Marc J. Hershman, Institute for Marine Studies (HA-35), University of Washington, Seattle, WA 98105.

Manuscripts will be accepted with the understanding that their content is unpublished and not being submitted for publication elsewhere. If any part of the paper has been published previously, or is to be published elsewhere, the author must include this information at the time of submittal.

Form. Submit five typed copies of the paper, in English, reproduced on one side of good quality opaque paper. (An additional copy should be kept by the author.) Each copy must be complete. Type the text, including footnotes and references, double-spaced. Allow margins of at least an inch on all sides of the typed pages. Number manuscript pages consecutively throughout the paper.

Abstracts. Each paper should be summarized in an abstract of not more than 150 words. An abstract prefaces each paper and should enable the reader to know whether the paper is pertinent to his needs. Do not include references or symbols.

Affiliation. On the title pages include full names of authors, academic and/or other professional affiliations, and the complete address and telephone number of the author to whom proofs and correspondence should be sent.

References to the Literature. Follow the Chicago Style Manual. "A Uniform System of Citation" should be followed in the case of legal articles.

Figures. All figures must be submitted in a form suitable for good reproduction. Do not submit Xerox copies of figures taken from another printed source. If you wish to use that source, have a glossy photostatic copy of it made. Each figure should have a brief descriptive title, and be drawn or mounted on separate sheets. Number figures according to the sequence of their appearance in the text, referring to them as Fig. 1, etc. In the margin of each figure, give the figure number, name of author, and title of this journal.

Tables. All tables must be discussed or mentioned in the text and numbered (with arabic numerals) in order of mention. Each table should have a brief descriptive title. Do not include explanatory material in the title; use footnotes, keyed to the table with superior lower-case letters. Place all footnotes to a table at the end of the table. Define all data in the column heads. Every table should be fully understandable even without reference to the text.

Spelling and Hyphenation. The authority is Webster's Unabridged Dictionary.

Permissions. If any figure, table, or more than a few lines of text from previously published material are included in a manuscript, the author must obtain written permission for republication from copyright holder.

Copyright. Under the new copyright law, the transfer of copyright from author to publisher must now be explicitly stated to enable the publisher to assure maximum dissemination of the author's work. Copies of the form for use with this journal can be obtained from the Editor.

Proofs. All proofs must be corrected and returned to the publisher within 48 hours of receipt. Only correction of typographical errors is permitted. The author will be charged for additional alterations to text at the proof stage.

Reprints. A total of 25 reprints of each paper will be supplied free of charge. Additional copies may be ordered at charges shown in the reprint scale that will be sent to the author with the proofs. Reprints are not available after publication of the issue.

Information for Authors

Manuscripts and books for review should be submitted to the Editor-in-Chief, J. Robert Moore, Director, Marine Science Institute, University of Texas, P.O. Box 7999, University Station, Austin, TX 78712. A manuscript will be accepted with the understanding that its content is unpublished and that it is not being submitted for publication elsewhere. If any part of the paper has been published previously, or is to be published elsewhere, the author must include this information at the time of submission.

Scope. *Marine Mining* publishes papers of interest to professionals, academics, and others whose work and interests are in the areas of undersea mining, mining, ocean sciences, and engineering. To be considered for publication, submitted papers should meet the following requirements:

Manuscript Requirements *Form:* Submit an original and two copies of the paper, in English, on one side of good quality opaque paper about 21.5 × 28 cm (8½ × 11 in.) in size. An additional copy should be kept by the author. Each copy must be complete and should conform to the style of this journal. Type text and references double-spaced. Allow wide margins of at least 3 cm (1 in.) on all sides of the typed page. Number manuscript pages consecutively throughout the paper.

Affiliation: On the title page include name(s) of author(s), academic or other affiliation(s), and the address of the author to whom proofs and correspondence should be sent.

Abstract: An informative abstract of not more than 250 words should describe the contents of the paper. Do not include references in the abstract.

Spelling, Hyphenation, and Scientific Notation: The spelling and hyphenation authority is Webster's Unabridged Dictionary. The Systeme International (SI), or modern metric, units are strongly preferred. English units may be used *only* if SI equivalents are given as well.

References: Refer to references in the text by author and date. In the alphabetical list of references, following the text, the style should conform to the usage in this journal. Full citations are strongly preferred over abbreviations.

Illustrations: All illustrations must be submitted in a form suitable for good quality reproduction and must be drawn on separate sheets. The lettering should be sufficiently large to withstand reduction to 11-cm (4½-in.) width of a page and still be at least 2 mm (⅛ in.) high. Black-ink line drawings or glossy photographs are acceptable. Xerox copies of artwork are not acceptable. Number figures according to the sequence of their appearance in text, referring to them as Figure 1, etc. In the margin of each figure give the figure number, name of author, and title of this journal.

Do not write on the backs of photographs. Captions should be typed double-spaced on a separate page.

Tables: All tables must be discussed or mentioned in the text and numbered (with arabic numerals) in order of mention and typed on separate sheets. Do not include tables in the text. Each table should have a brief descriptive title. Do not include explanatory material in the title; use footnotes, keyed to the table with *letters* (as opposed to numbers). Place all footnotes to a table at the end of the table. Define all data in the column heads. Every table should be fully understandable without reference to the text and should supplement the text rather than duplicate it.

Copyright: Under the new copyright law, the transfer of copyright from author to publisher must now be explicitly stated to enable the publisher to assure maximum dissemination of the author's work. Copies of the form for use with this journal can be obtained from the Editor.

Proofs: All proofs must be corrected and returned to the publisher within 48 hours of receipt. Only correction of typographical errors is permitted. The author will be charged for additional alterations to text at the proof stage.

Reprints: A total of 25 reprints of each paper will be supplied free of charge. Additional copies may be ordered at charges shown in the reprint price scale that will be sent to the author with the proofs. Reprints are not available after publication of the issue.
